III. This problem set has four questions and concerns the phonological alternations among singular (sg.; e.g., *house*), singular definite (sg. def.; e.g., *the house*) and plural (pl.; e.g., *houses*) nouns in Somali. Read through the following questions and the data given. Answer these questions following the instructions given. These questions might be related to each other; hence, your answer to one of them might be built on the answer you have had to its precedent. (65%)

Note: [β, ð, γ] are voiced fricatives, [d̥] is a retroflex stop, and [ɾ] is a retroflex fricative. For the alternation between [lt] and [š], simply arbitrarily state it as: [lt] → [š].

Q1. Given the data below,

- (1) Parse the singular, singular definite, and plural nouns in Table 1 into root+suffix and isolate the alternations.
- (2) Describe the rules that account for these alternations and specify the way they are ordered, if they are.
- (3) Provide derivations for the forms of 'sea'.
